

SAFARIONIX CLOUD / CUSTOMER AGREEMENT SCHEDULE

90-Day Performance Commitment

This schedule is to be incorporated into the signed Safarionix Cloud customer agreement. Complete the commercial details and evaluation dates before deployment.

No Safarionix subscription payment is required during the first 90 days.

Evaluate the production Cloud platform. Continue and pay from the beginning of deployment, or decline within the agreed evaluation period and owe **\$0** in Safarionix subscription fees.

1. Agreed customer and deployment details

Safarionix contracting entity	_____
Customer legal name	_____
Master customer agreement reference	_____
Eligible Cloud scope / warehouses	_____
Production activation date	_____
90-day evaluation start / end dates	_____
Subscription fees for the initial 90 days	Amount / currency: _____
Normal monthly subscription and invoice terms	_____
Standard Cloud implementation and support scope	_____
Decision notice method and contact	_____
Agreed export and offboarding arrangements	_____

2. Eligibility and the evaluation period

Eligible Safarionix Cloud customers only. Eligibility, activation date, subscription fees and implementation scope are confirmed in the signed customer agreement before deployment.

The commitment applies to the customer's first agreed 90 calendar days of the production Safarionix Cloud deployment. It applies to eligible Safarionix Cloud subscription fees only.

3. The customer's choice

Keep Safarionix

If you are satisfied and choose to continue, the subscription becomes active. The first invoice includes the subscription fees for the initial 90-day period, followed by normal monthly billing thereafter.

Walk Away

If you decide Safarionix is not the right fit within the agreed 90-day evaluation period, no Safarionix subscription fees are owed. We terminate the Safarionix Cloud service and complete the agreed offboarding process.

No long-term subscription commitment.

Continued use and billing acceptance

Continued use after the agreed evaluation period constitutes acceptance and triggers billing according to the signed customer agreement, including subscription fees from the beginning of deployment.

4. Costs outside the commitment

The 90-Day Performance Commitment does not automatically include or waive:

- Custom software development
- Data migration projects
- Hardware
- Third-party software or services
- Cloud infrastructure purchased directly by the customer
- Bespoke integrations
- EDI onboarding fees
- Shipping equipment
- Carrier charges
- Professional services specifically agreed outside the standard Cloud implementation

These costs are not automatically included or waived. Any such costs must be clearly disclosed and agreed before work begins.

Separately agreed charges remain governed by the signed agreement. The \$0 subscription outcome does not waive costs outside the eligible Cloud subscription.

5. Decision and offboarding

The customer's decision, the agreed evaluation dates, the decision notice method and the export and offboarding arrangements must be recorded in the customer agreement. If the customer decides not to continue within the agreed evaluation period, Safarionix terminates the Cloud service and completes the agreed offboarding process.

6. Private Deployment is separate

The 90-Day Performance Commitment does not apply to Safarionix Private Deployment.

Starting at \$250,000 USD. Private Deployment includes commercial source-code licensing, infrastructure work, DevOps, implementation and technical handoff. It follows a separate enterprise agreement and payment schedule, plus applicable implementation, DevOps, customization and ongoing support.

7. Incorporation into the customer agreement

The signed customer agreement must include these detailed terms and the completed schedule. This website download alone does not activate a deployment or create a subscription. The parties confirm the eligible Cloud scope and commercial details before production activation.
